

Alesha Findlay

Tahiti Tan

A touch of the South Pacific, warm sun, gentle breeze and a few moments of meditative bliss. For a minute, feel that you are in Tahiti. At 22, owner Alesha Findlay has been providing this ultimate tanning experience for almost a year, "Indoor tanning just brightens up your day, and it's healthy too." Alesha provides up to date information on tanning and tanning equipment, understanding that modern advanced tanning equipment simulates sunlight in a natural way as the body produces vitamin D, an essential vitamin most Canadians lack.

Tanning equipment has improved over the years and Alesha offers her clients a higher level of tanning with the latest, state of the art equipment available to the tanning industry; the California Tan Autobronzer (exclusive to the Fraser Valley with only 10 machines in Canada); the Supersonic, and the recently ordered Open Sun 550 with air conditioning to name a few.

Alesha also educates her clients about proper skin care, the essentials of keeping a golden tan, looking great and of course making a tan last as long as possible. "I love working with clients and helping them look and feel their best." As she reaches her first year in business Alesha thanks her father for helping her get started, "My father believed in me and knew that with hard work and dedication I could achieve my goal to have one of the most successful tanning salons in the industry."
